

Cover Your Assets

Comprehensive Services for Your Industrial Equipment

INDUSTRY-LEADING SERVICE FOR YOUR PEACE OF MIND

Maintaining your organization's critical equipment is getting harder every day. Productivity demands, aging machines, and staffing shortages can put a strain on any maintenance team. Ensuring your operation is running at peak efficiency can feel like a second full-time job.

Reliable Results

Donaldson helps you monitor, manage, and maintain your industrial equipment, improving efficiency and reducing downtime.

With more than 50 years of installation, service, and maintenance experience, our certified Filtration Services technicians have addressed nearly every equipment challenge facing today's processing and manufacturing operations.

That experience translates to reliable strategies, plans, and technologies designed to help you take care of your equipment management issues and add to your **peace of mind**.

Real-Time Support

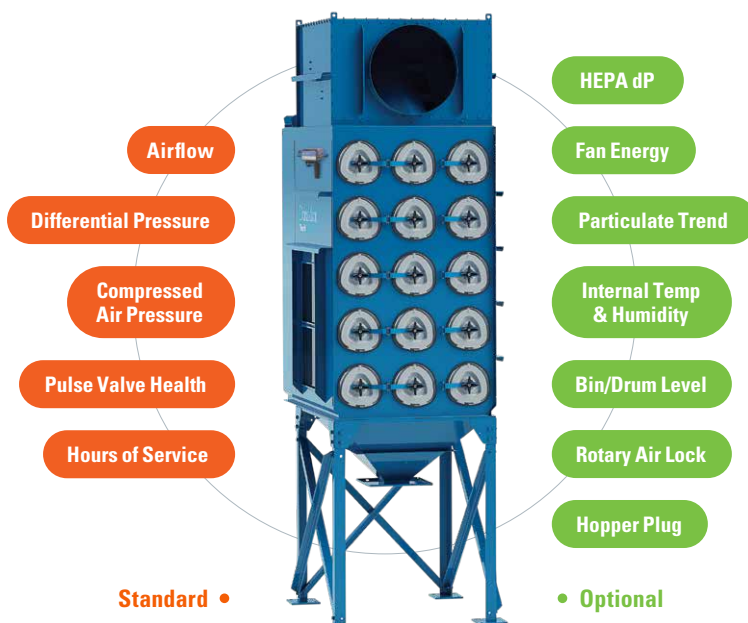

Our dedicated professionals can monitor your connected equipment and alert you to any concerns. We can work directly with your team to troubleshoot any issues or dispatch a certified service technician to handle the work on your behalf.

SCALABLE SERVICE PLANS PUT YOU IN CONTROL

Donaldson Filtration Services can monitor or fully manage your filtration equipment so you and your maintenance team can focus on other needs within your operation. Our service plans are designed to allow you to take on as much — or as little — of your system's maintenance and management as you like.

Service History Record						✓
Unplanned Repairs						✓

*Includes one set of filters

Smarter Services Enabled by Technology

Donaldson's iCue™ Connected Filtration Technology is a remote monitoring system that continuously tracks equipment performance, alerting you and Donaldson service staff to maintenance needs.

Through a collection of sensors, the technology provides actionable insights and generates alerts should the equipment operate outside optimal parameters. It enables condition-based services, faster response times, and a lower total cost of ownership.

The system can help identify potential problems before they arise. Donaldson's iCue Technology comes standard with our smart service plans and can help add to your peace of mind.

ON-DEMAND, PREVENTATIVE, AND CONDITION-BASED SERVICE

With a global network of more than 250 Donaldson technicians, dozens of authorized service partners, and access to over 100,000 replacement parts, Donaldson services all major filtration equipment brands to keep your operation up and running efficiently.
